

OrgHub Comprehensive User Navigation and Operations Manual

1. Introduction & Core Workspace Hierarchy

OrgHub simplifies the administrative burden of running a student organization by grouping activities into distinct, nested contextual layers. Understanding these structures is the first step toward effective navigation:

Workspace Concept	Functional Operational Description
Organization	The highest level administrative umbrella representing the student collective entity (e.g., a computer club, student union, or media society).
Division	A permanent structural sub-group or department acting within the larger organization (e.g., Research and Development, Marketing, Human Resources, or External Event Organizing).
Project	A targeted, time-bound initiative or specific campaign running inside a parent division (e.g., An official application website revamp or a specific hackathon event).
Member	An authorized application user who has joined or been explicitly invited into a specific organization, division, or project layer.
Role	A defined permission container that dictates precisely what an assigned member can view, edit, create, or delete across various

Workspace Concept	Functional Operational Description
	structural levels.

2. Getting Started & Authentication

2.1 Account Registration

Setting up a clean, verified user account is quick and automated. Follow these detailed steps to complete registration:

1. Launch your preferred browser and navigate directly to your OrgHub interface portal URL (<https://orghub.vercel.app/>).
2. Locate the authentication block and click the text labeled **"Register Now"** positioned at the bottom section of the interface layout.
3. Provide required profile credentials in the registration inputs:
 - **Email:** Enter your valid communication email. This will be automatically normalized to lowercase by system architecture rules to prevent duplicate accounts.
 - **Password:** Must fulfill the minimum system complexity rule of being at least **8 characters** in length.
 - **Confirm Password:** Carefully re-type your chosen password to guarantee matching configuration strings.

4. Click the **"Create Account"** submit button.

2.2 User Login Procedures

To enter an active user account environment safely:

1. Navigate directly to the OrgHub login portal interface.
2. Input your registered account **Email** and associated **Password**. You can comfortably toggle visual character visibility hidden status by selecting the **eye icon** component nested inside the password input row.
3. Select the primary submission control labeled **"Sign In to Portal"** to instantly enter the personalized system Dashboard.

2.3 Processing Pending Workspace Invitations

Active registered users can respond to workspace requests using a pathway:

- **The Internal Settings Module Pathway:** Navigate to the **Settings** side button item, transition directly to the **Organization settings** tab, scroll carefully down to find the designated **"Pending invitations"** grid block, and click **"Accept invitation"** to join the scope

instantly.

3. Application Layout & Navigation Flow

3.1 Global Navigation Sidebar

The global left-side navigation sidebar acts as your core module picker. The table below details each option:

Sidebar Item	Functional Navigation Objective
Dashboard	Your aggregated personal home screen showing custom greetings, meeting widgets, and live deadline overviews.
Workspace	A multi-level module directory used to inspect parent organizations, department divisions, or individual project contexts.
Tasks	The main workflow control center utilizing an interactive, drag-and-drop Kanban task board.

Sidebar Item	Functional Navigation Objective
Calendar	An agenda suite supporting Month, Week, and Day layouts for tracking formal meetings, milestones, and socials.
Files	A cloud file locker module supporting organized file uploads up to 100MB for sharing assets across the team.
Announcements	A unified organizational feed displaying broadcast updates sorted by priority levels.
Settings	A custom management terminal used to configure profiles, secure passwords, create organizations, or handle pending invites.
Log Out	Instantly terminates the current user token session and safely returns the display to the login screen.

Sidebar Navigation Controls: Users can compress the sidebar into a compact, icon-only layout by clicking the **chevron icon** located at the bottom of the column. This setting automatically persists across separate user sessions.

Workspace > Ureeka > R&D

3.2 Top Bar Breadcrumb Contexts

The top bar provides deep contextual guidance as you browse nested spaces. Active structural directories generate interactive trail paths (e.g., Workspace > Organization Name > Division Team), allowing you to jump back to higher scopes instantly with a single click.

4. Personalized Dashboard

Hello, Tester1!

You're all caught up — no urgent deadlines or meetings today..

The Dashboard serves as an operation command center, pulling key summaries from all your active organizations into a single screen:

- **Personal Greeting Summary Line:** Displays a dynamic header labeled "Hello, [First Name]!" combined with live calculations showing your urgent deadlines (tasks due in under 72 hours) and meetings scheduled for the current day. A fast-access **"Create Task"** button is also available in the top-right corner.
- **Upcoming Deadlines Card Widget:** Organizes uncompleted tasks assigned to you by due date. Each distinct card reveals titles, due configurations, step badges (To Do, In Progress), and fellow assigned member names. Clicking a card opens the main Tasks view with that task's details displayed.
- **Upcoming Meetings Card Widget:** Displays chronological schedules for upcoming calendar items. Each record presents the subject title, start time, and a color-coded type indicator (Meeting, Event, Milestone). Selecting any row opens the detailed **Event Detail Modal**.
- **Live Announcement Feed:** Positioned along the bottom section of the dashboard, this widget creates a centralized, reverse-chronological stream of all broadcasts posted across your organizations. Clicking an item opens the full content view with author details, priority markers, and creation dates.

5. Workspace Structures & Component Directories

5.1 Workspace Landing Page

The landing zone is split into two primary operational views:

- **Divisions Tab:** Renders a visual card deck of all divisions you have permission to access. Each card shows the division name, parent organization name, your current role, project counts, and active task numbers.
- **Members Tab:** Aggregates all your memberships into two neat categories: *Organizations* and *Divisions & Projects*, with official role badges assigned to each line item.

Core Board officers will see a **"New division"** creation shortcut button here. If an executive holds Core Board status across multiple organizations, a helpful dropdown lets them pick the target organization.

5.2 Organization Detailed Panel View

Accessible by selecting an organization card. This dashboard splits administrative details into three distinct tabs:

- **Divisions Tab:** Lists existing functional departments. Core Board administrators can use the **"New division"** action button from this view.
- **Announcements Tab:** Houses all organization-wide updates. Core Board members can draft and post new announcements directly from this view.
- **Members Tab:** Displays an exhaustive repository table of all registered organization personnel, including full names, primary emails, structural role level, and join dates.

5.3 Division Detailed Panel View

Accessible via division cards. This department panel features three tabs:

- **Projects Tab:** Lists active structural projects. Division Heads and Core Board officers have access to a **"New project"** button here.
- **Tasks Tab:** Displays department-specific tasks on a dedicated Kanban board.
- **Members Tab:** A table tracking names, emails, internal roles, and onboarding dates for division staff.

5.4 Project Detailed Panel View

Accessible via project cards. This view isolates execution data into two tabs:

- **Tasks Tab:** Displays the interactive Kanban board for project-scoped workflows. Project Leads can use the **"New task"** creation button here.
- **Members Tab:** Lists all personnel assigned to the project.

5.5 Step-by-Step Workspace Creation Matrix

The screenshot shows a dark-themed application interface with a modal dialog titled "Create organization". The dialog has a close button (X) in the top right corner. Below the title, a message states: "You'll be added as the first Core Board member." The form contains two main sections: "NAME" and "DESCRIPTION". The "NAME" section has a text input field with the placeholder "e.g. Student Executive Board" and a label "The full display name of your organization." below it. The "DESCRIPTION" section has a larger text area with the placeholder "What does this organization do?" and a label "Optional. Add a short mission statement or summary." below it. At the bottom right of the dialog are two buttons: "Cancel" and "Create".

Create organization X

You'll be added as the first Core Board member.

NAME

e.g. Student Executive Board

The full display name of your organization.

DESCRIPTION

What does this organization do?

Optional. Add a short mission statement or summary.

Cancel Create

The screenshot shows a dark-themed application interface with a modal dialog titled "Create division". The dialog has a close button (X) in the top right corner. Below the title, a message states: "Only Core Board members can create divisions." The form contains two main sections: "DIVISION NAME" and "DESCRIPTION". The "DIVISION NAME" section has a text input field with the placeholder "e.g. R&D". The "DESCRIPTION" section has a larger text area with the placeholder "What does this division focus on?". At the bottom right of the dialog are two buttons: "Cancel" and "Create".

Create division X

Only Core Board members can create divisions.

DIVISION NAME

e.g. R&D

DESCRIPTION

What does this division focus on?

Cancel Create

Create project ✕

Core Board and Division Heads can create projects.

PROJECT NAME

e.g. OrgHub Portal

DESCRIPTION

What is this project about?

Cancel Create

The steps below describe how to create new workspaces across different structural levels:

1. **Creating a Top-Level Organization:** Open **Settings > Organization settings**, select the **"Create organization"** control action, populate the structural name and description, and click **"Create"**. The creator automatically becomes the initial Core Board administrator.
2. **Creating an Internal Division:** Open the parent Organization view or main Workspace screen, select **"New division"**, input a unique division name along with a summary description, and click **"Create"**.
3. **Creating an Internal Project:** Open the parent Division view, select **"New project"**, input a unique project name along with a summary description, and click **"Create"**.

6. Member Management & Invitations

Workspace onboarding is **invitation-only**; new users cannot request to join an organization on their own. Authorized managers can invite members using the following process:

1. Navigate directly to the specific Organization, Division, or Project page where you want to add members.
2. Click the **"Invite member"** action button to open the invitation modal.
3. Choose your preferred invitation method:
 - **Member Picker Mode:** Available for internal Division or Project scopes. This option displays a selectable checklist showing all members currently in the parent scope. This

- view includes search controls to quickly filter members by name or email.
- **Email Invite Mode:** Available across all scopes. This option features a free-form text input field. You can perform **batch invitations** by entering multiple email addresses separated by commas, semicolons, or new lines (e.g., user1@email.com, user2@email.com).
4. Select the target role to be assigned upon invitation acceptance:
 - *Organization Scope:* Choose between regular **Member** or administrative **Core Board**.
 - *Division Scope:* Choose between regular **Member** or department-level **Division Head**.
 - *Project Scope:* Choose between regular **Member** or execution-level **Project Lead**.
 5. Click the **"Send invite"** control to dispatch requests.

Project Scoping Rule: When inviting members to a project, invitees must already belong to the parent organization. The system will automatically reject invitations for users who are not yet organization members.

7. Role-Based Access Control (RBAC) System

OrgHub enforces a strict role hierarchy where permissions naturally cascade downward from higher organizational levels. The structural grid below maps out authorization limits across the platform:

Platform System Actions	Core Board	Division Head	Project Lead	Regular Member
Create New Divisions	✓ Authorized	✗ Restricted	✗ Restricted	✗ Restricted
Create New Projects	✓ Authorized	✓ (Own Division)	✗ Restricted	✗ Restricted
Invite Organization Members	✓ Authorized	✗ Restricted	✗ Restricted	✗ Restricted
Invite Division Personnel	✓ Authorized	✓ (Own Division)	✗ Restricted	✗ Restricted

Platform System Actions	Core Board	Division Head	Project Lead	Regular Member
Invite Project Personnel	✓ Authorized	✓ (Own Division)	✓ (Own Project)	✗ Restricted
Create & Delete Scoped Tasks	✓ Global Scope	✓ Division Scope	✓ Project Scope	✗ Restricted
Update Dynamic Task Status	✓ Unrestricted	✓ Unrestricted	✓ Unrestricted	⚠ Assigned Only
Post Official Announcements	✓ Authorized	✗ Restricted	✗ Restricted	✗ Restricted
Upload / Delete Documents	✓ Global Scope	✓ Division Scope	✓ Project Scope	✗ Restricted
Leave Active Organization	⚠ If Not Last Admin	✓ Allowed	✓ Allowed	✓ Allowed

8. End-to-End Task Management

8.1 Viewing and Filtering Tasks

Navigate to the **Tasks** sidebar link to view your action items across four separate workspace tabs:

- **Assigned to me:** Tasks where you are actively designated as an assignee.
- **Created by me:** Track tasks that you originally authored and launched.
- **Managing:** Tasks visible through management positions (Core Board, Division Head, Project Lead).
- **All visible:** An exhaustive, unfiltered stream of all tasks you have access to across your active scopes.

Scope Filter Controls: Refine your view using the "**Scope**" dropdown menu to filter by *All scopes*, *Division tasks only*, or *Project tasks only*. A real-time task counter is conveniently located in the top-right corner of the filter bar.

8.2 The Interactive Kanban Board

Tasks are organized on a drag-and-drop Kanban board separated into three primary progress columns:

- **To Do:** Assigned work that has not yet been started.
- **In Progress:** Work that is actively being handled by team members.
- **Done:** Completed work verified by project managers.

Each task card displays its title, due date (which turns dark red if overdue), status badge, and assignee avatars. To update progress, drag a task card from one column into another.

Permission Rule: Only the original task creator or an assigned member can move cards across

columns. Unauthorized drag attempts will trigger an error message on screen.

8.3 Task Creation Process

The screenshot shows the 'New task' modal in the OrgHub application. The modal is centered and has a dark theme. It contains the following fields: 'TITLE' with a placeholder 'What needs doing?', 'DESCRIPTION' with a placeholder 'Add context, links, or acceptance criteria.', 'STATUS' set to 'To Do', 'DUE' date set to 'dd/mm/yyyy' at '09:00 AM', 'SCOPE' set to 'Project', 'PROJECT' set to 'Make Website for BNCC', and 'ASSIGNEES' with a search bar and a list containing 'Tester1'. At the bottom are 'Cancel' and 'Create task' buttons. The background shows a Kanban board with columns for 'Assigned to me' and 'Created by me'. A task card 'testtt' is visible in the 'Assigned to me' column. The top navigation bar includes 'Dashboard', 'Workspace', 'Tasks', 'Calendar', 'Files', 'Announcements', 'Settings', and 'Log Out'.

To create a new task, select the **"New task"** button from the Tasks panel or click **"Create Task"** on the main Dashboard. Complete the creation form fields as follows:

- **Scope Assignment:** Select whether this task belongs to a Division or Project scope, then pick the specific team target from the dropdown list.
- **Title String:** Mandatory input, limited to a maximum of 255 characters.
- **Description Details:** Optional rich text area used to outline specific assignment goals.
- **Assignee Registries:** Enter team member email addresses separated by commas or new lines. If left blank, the system will apply the **auto self-assignment feature**, automatically assigning you as the task's primary owner.
- **Due Date Picker:** Optional scheduling calendar field used to set a specific deadline.

8.4 Task Detail Drawer & Removals

Clicking any Kanban card slides out the **Task Detail Drawer** from the right side of the screen. This panel provides a comprehensive view of task properties:

- **Field Editing Controls:** The task creator can update all fields (title, description, due date, assignees, and status). Assigned members can only modify the **status dropdown** field. Other users will see a read-only message stating: *"You have view access only."*
- **Task Deletion Steps:** Only the original task author can delete a task. To remove a task, open the detail drawer, click the red **"Delete"** action button in the bottom-left corner, and confirm the permanent removal in the browser pop-up window.

9. Calendar Scheduling, Events, & Milestones

9.1 Navigation Layout Views

The **Calendar** module offers three highly detailed operational views:

- **Month View:** Standard grid matrix showing scheduled events as colored chips. Displays up to 3 event items per calendar day block, with an overflow counter (e.g., "+2 more") grouping additional records.
- **Week View:** A continuous 7-day hourly schedule grid block where event cards are accurately positioned based on their start and end times.
- **Day View:** A single-day view focusing on hourly blocks. Shows event locations, exact times, and clear topic titles.

Navigation controls include standard back and forward arrows (← / →), a **Today** button to return to the current date, view toggles, and a scope selector dropdown to filter calendars by organization or project.

9.2 Event Types & Visual Color Codes

Calendar entries are color-coded into three distinct event types:

Event Type	Color Code	Standard Operational Use Case
Meeting	Teal	Formal alignments, recurring syncs, and 1-on-1 team feedback reviews.
Milestone	Violet	Key deadlines, delivery checkpoints, product launch dates, and phase transitions.
Event	Amber	General activities, public workshops, social gatherings, and open onboarding events.

Only users with management roles (Core Board, Division Heads, or Project Leads) can create calendar events. Follow these steps to schedule an event:

1. Click the **"New event"** action button in the calendar header, or click directly on any empty date cell in the calendar grid to auto-fill the start date.
2. Enter the event details: title, type (Meeting, Milestone, Event), and start date/time. Setting an end date/time is optional, but it must be scheduled after the start time.
3. Provide an optional location. If you enter an online meeting link (e.g., a Zoom or Google Meet URL), the system will automatically render it as a clickable hyperlink.
4. Add an optional description, individual member assignees, or select entire organization divisions to invite large sub-groups at once.
5. Click **"Create"** to publish the event to the calendar.

10. Cloud Files & Asset Document Repository

10.1 Browsing Shared Assets

Navigate to the **Files** sidebar option to browse team documents. The module splits repositories into three contextual tabs: **Organizations**, **Divisions**, and **Projects**. Use the Repository Selector dropdown to choose which specific team layer to browse, or use the search bar to filter assets by title or description details.

10.2 File Upload Guidelines

Personnel with management access can upload files by choosing their target repository scope and clicking the **"Upload file"** button. The platform enforces the following document constraints:

- **Maximum Allowed File Size:** Strict limit of **100 MB** per upload file.
- **Supported Extensions:** .pdf (PDF documents), .docx (Word processing files), .xlsx (Excel spreadsheets), and .pptx (PowerPoint presentation slides).

10.3 Downloads & Deletion Security Permissions

While all members with access to a scope can download shared documents, deleting files is restricted by role hierarchy permissions:

- **Organization Repository Layer:** Files can be deleted by **Core Board** administrators only.
- **Division Repository Layer:** Files can be deleted by **Core Board** or the designated **Division Head**.
- **Project Repository Layer:** Files can be deleted by **Core Board**, **Division Heads**, or the active **Project Lead**.

11. Organization Announcements (Broadcasts)

Announcements serve as organization-wide broadcasts used to communicate important updates to all members. Only **Core Board** members have permission to create announcements across the platform:

1. Navigate to the **Announcements** sidebar link or open the Announcements tab on an Organization Detail page.
2. Click the **"Post announcement"** control button. If you manage multiple organizations, choose your target organization from the dropdown list.
3. Provide a mandatory title, clear content text, and assign a priority level: **Low** (neutral gray

badge), **Normal** (teal badge), or **High** (red/amber alert badge).

4. Click **"Post"** to distribute the broadcast to your organization's dashboard feeds. Core Board members can also delete announcements at any time using the trash icon inside the detail modal view.

12. In-App Notification Engine

OrgHub includes an in-app notification engine to keep you informed about key workspace activities. Notifications are triggered by the following events:

- **Task Reminders:** Triggered when an assigned task is due within 24 hours.
- **Event Reminders:** Triggered when a calendar item you have access to starts within 24 hours.
- **New Announcements:** Triggered instantly when a new broadcast update is posted in your organization.

Notifications can be viewed in the designated notifications section on your Dashboard. You can click individual notifications to mark them as read, or select the **"Mark all read"** action button to clear your unread inbox all at once. Note that notification alerts are generated by a backend system management command named `generate_reminders`, and external email or push alert integrations are not supported.

13. Account Customization & Settings

Settings
Manage your account, security, and organization workspaces.

Change password

Navigate to the **Settings** sidebar icon to update your user configuration across four management tabs:

- **Profile Settings Tab:** Update your professional display details, including your mandatory Full Name, Academic Major (e.g., Computer Science), and Campus Location. Your account email address is read-only and cannot be changed. Click **"Save changes"** to update your profile.
- **Security Settings Tab:** Update your account password by entering your current password followed by your new password (which must be at least 8 characters long). Confirm your new password and click **"Change password"** to complete the update.
- **Organization Settings Tab:** View your active workspace organizations, switch your current workspace context, or choose to leave an organization. **Warning:** Leaving an organization

instantly removes your access to all its nested divisions, projects, files, and tasks. Core Board members are barred from leaving if they are the **last active Core Board member** in that organization; an additional admin must be assigned before they can exit.

- **Pending Invitations Tab:** Displays outstanding requests to join organizations, divisions, or projects, including offered roles and expiration dates. Click **"Accept invitation"** on any invitation card to join the workspace immediately.

14. Appendix: Quick Interaction Reference

The tables below provide a quick reference for shortcuts and status colors used across the platform:

Target Platform Objective	Interaction Method Shortcut
Create a Task from the Dashboard	Click the "Create Task" button in the top-right corner.
Directly Navigate to a Specific Task	Append the query parameter ?task=<id> to your Tasks page URL.
Open the Task Creation Form via URL	Append the query parameter ?create=1 to your Tasks page URL.
Schedule an Event from the Calendar Grid	Click directly on an empty date cell inside the Month, Week, or Day grid.

System Status Badge	Assigned Badge Color
To Do / Regular Member Role	Gray (Neutral)
In Progress Status / Announcement High Alert	Amber / Orange Alert

System Status Badge	Assigned Badge Color
Done Status / Core Board Admin Badge	Teal
